Controllers

The following controllers can be paired with the console and used with this software:

- Only one Wii U GamePad can be used with this software at a time.
- Some parts of the game cannot be played using only a Wii U Pro Controller.

Pairing Controllers

Open the HOME Menu and select "Controller Settings" ⇒ "Pair".
Follow the on-screen instructions to pair your controller.
Connect to the internet to enjoy the following:

- Downloadable Content Purchase

- For information about connecting your Wii U console to the internet, refer to the Wii U Quick Start Guide.

**Purchasing Downloadable Content**

**Procedure**

Select "ESHOP" on the title screen of the game to go to Nintendo eShop. From there, follow the on-screen instructions, referring to the information about DLC/passes in the Nintendo eShop electronic manual.

- To open the electronic manual, select "Menu" in Nintendo eShop, then select "Help", followed by "Manual".
Parents and guardians can restrict certain features of the Wii U console through Parental Controls on the Wii U Menu.

The following features can be restricted:

#### Touch Controls

You can touch items on menus, as well as information displayed on the GamePad screen, to select them, move them around and get more detailed explanations.
Managing Game Data

Selecting "Save" from the System section of the menu will allow you to save your progress. You will also be prompted to save your game between chapters and at other spots throughout the game.

Deleting Save Data

You can delete your save data by choosing System Settings in the Wii U Menu and then selecting "Copy/Move/Delete Data" in the Data Management menu.

♦ Please take care when deleting your save data. Once deleted, save data cannot be recovered.
Press \( \bigcirc \) when not in battle or a cutscene to access the menu.

**Using the Menu**

**Skills**

Any skills that are not greyed out can be used here. Their names, effects and required EP are all displayed.

**Items**

View your inventory, Performa and key items. You can also use any items that are not greyed out.

**Wardrobe**

View and change a character's equipped weapon (Carnage), accessory and outfit.

**Artists**

View the status and profiles of your party members. After selecting a character, press \( \bigcirc \) to access their skill information and change the order of their skills.

**Casting**

Swap your active party members.

**Analysis**

View enemy details. This information is displayed on the GamePad screen.

**System**

Save or load data, change various settings, or adjust the game difficulty.
While in the field, the GamePad screen displays a social media service called Topic. You can touch any of the four categories on the bottom of the screen to open their respective tabs.

✉️ Main Story

Messages that you receive from other characters relevant to the main story.

📞 Side Story

Messages that you receive from other characters related to advancing their side stories.

👥 Contacts

Messages exchanged between Itsuki and the other characters in the game.

🗺 Map

Displays the map. Select "Icon Help" on the left side to view the map legend.
Movement

Field
While in the field, you can enter into conversations or investigate the area to advance the story.

Recovery
To restore HP and EP and remove status effects, either use items and skills or buy beverages from vending machines. There are other ways to restore your health while in the field, too - try looking around.

Tokyo Map
Used to move between different parts of Tokyo. Exiting from the outer edge of a field map will take you to this screen.

♦ In areas where "⑩ Tokyo Map" is displayed, you can access the Tokyo Map screen by pressing ⑩.

Requests
Characters with a ⌇ over their heads have requests for you. While their request is in progress, the icon above their head will change to ⌈; fulfilling the conditions of the request will change it to ⌉. If you talk to them while this mark is shown, you will receive a reward.
Enemies will appear while you are in the Idolasphere. Running into them will initiate a battle. If you use ① to strike them first, then run into them when they are down, you may get an advantage going into battle.
1. **Rounds and Turn Order**

Combatants take their turn in the order shown from left to right. Once every combatant has acted, the next round begins.

2. **Session Lineup**

Shows the order in which other party members will use their displayed skills, should the currently selected attack trigger a Session.

3. **Target Cursor**

Appears when you are selecting an enemy to target. The top part shows the enemy’s level and remaining HP, while the bottom half shows their resistances.

4. **Combat Actions**

During battle, you can choose from the following actions, or view more detailed information on the situation.
### SP Gauge

The SP Gauge rises as you perform actions in battle. When it is full, you will gain one SP. You can use earned SP to activate powerful attacks called Special Performances.

### Party Panel

Shows the party's condition. If there's any change to a party member's status, it will be shown here as well.

### Support Effects and Status Ailments

Examples of Support Effects
Examples of Status Ailments

- Poison, which inflicts damage at the start of a character's turn.

- Sleep, which prevents a character from taking action. All attacks against them are automatically critical.

- Confusion, which causes a character to act uncontrollably.
Select commands to direct your allies in battle.

**Attacking**

You can choose whether to deal a regular Attack or use a special Skill. If the enemy is weak to the damage type that you use, a ! icon will show up beside its name. Try aiming for their weak points.

♦ Press ⑦ to activate auto-battle, causing your characters to use only the Attack command, and battle to progress at a high speed. Pressing ⑦ once more will deactivate auto-battle.

**Viewing Resistances**

| Wk | Rs | - | Wk | Rs | - |

Wk: Enemy is weak to this attack type (damage increases).

Rs: Enemy is strong against this attack type (damage decreases).

−: Enemy is neither strong nor weak against this attack type

♦ Enemy resistances are shown as "?" until you use an attack of that damage type against the enemy. Some enemies will have resistance types other than those listed above.

<td>Electricity</td>
</tr>
<tr>
<td>Bow</td>
<td>Force</td>

</tbody>
</table>

**Session Attacks**

Successfully striking an enemy's weak point will trigger follow-up attacks by allies with the Session Skill of a corresponding element. These are called Session Attacks. Selecting a skill that will trigger a Session Attack will show the Session Lineup in the upper left area of the screen.

- Enemies can also execute Session Attacks, so mind your party’s own weaknesses.
Defeating all of the enemies will result in victory. In addition to experience points and mastery points, which allow you to learn new skills, you are also awarded money and items. The rewards you receive after a battle increase as you pull off more Session Attacks, so try to chain together as many as you can.

**Learning Skills**

After gaining enough mastery points with a weapon on the victory screen, you will be taken to the skill acquisition screen, where you can learn new skills or power up the ones you already know. If your skill list is already full, you will either need to overwrite an existing skill or abandon the new one. If you do not wish to learn any new skills, press ③ to close the screen without making any changes.

**Defeat**

If all of your party's HP reaches zero, the game is over and you will be taken back to the title screen.

◆ This applies to all difficulty settings except Easy.
During battle, the abilities, resistances, skills and other details of your party members and the enemies they are fighting are shown on the GamePad screen. Touch the ‹ and › arrows at the bottom of the screen to switch pages.

On your first encounter with a new enemy, very little information on them is known.
